

## **PRE-WIRED SHAFT LIGHTING & R.C.D SOCKETS**

Elevator Equipment Limited have designed and manufactured a complete range of Shaft Lighting and Shaft Power Systems.

All the components are pre-wired and mounted on fixing brackets.

All you need to do is screw it to the wall, plug it together and connect it to a power supply.

This Shaft Lighting System has been designed for all makes and types of lifts from hydraulic to motor Room-less lifts.

All our lights are IP65 rated and are manufactured to British Standards.

The cable used is double insulated and also complies with British Standards wiring codes.

The lights used within our standard system are 4ft twin fluorescents but other options are available to suit you and your customer's requirements.

All our systems can accomodate emergency lighting if required.

We also supply pre-wired shaft power systems. Designed to introduce RCD power into the lift pit and shaft areas.

The benefits of using this system are:

- \* REDUCED INSTALLATION TIME OF UP TO 70%**
- \* PROVIDES THE LIFT SHAFT WITH MINIMUM OF 50 LUX**
- \* IMPROVED PROFIT MARGINS**
- \* BETTER AND MORE PROFITABLE USE OF YOUR SKILLED WORKFORCE**

We can guarantee that once you have used this system you will not return to conventional methods of installing shaft lighting.

**SYSTEM FIVE****SHAFT POWER SYSTEM  
WITH MACHINE ROOM SOCKET TO PIT SOCKET**

QTY	CODE	PRICE
1	SPS/1 - RCD MACHINE ROOM	£
1	SPS/5 - 5 METRE EXTENSION	£
1	SPS/10 - 10 METRE EXTENSION	£
1	SPS/15 - 15 METRE EXTENSION	£
1	SPS/2 - RCD PIT SOCKET	£

**HOW TO ORDER**

1. Mount the RCD sockets in a suitable position.
2. Determine the distance between both RCD sockets.
3. Select the best combination of extension lead lengths required to connect the RCD sockets together.

**TECHNICAL INFORMATION:**

- RCD Socket with Power Lead
- 3 Types of Extension Leads
- RCD End Socket
- All Necessary Fixings
- Drill Bit
