

## Floor-mounted hoods

The floor-mounted hood is universally usable. Through the 8mm aluminium perforated sheet, a sight check of the covered component is possible at any time. The hoods can easily and quickly be assembled. For fastening them to the floor there are two mounting options (see illustration below). The first variant gives the possibility of a quick removal in case of inspections, malfunctions and maintenance purposes.

**Floor attachment variant 1,**  
with dowels of 10mm, hanger bolts,  
M6 wing nuts and M6 nuts

**Floor attachment variant 2,**  
with dowels of 12mm, screws and  
plain washers

Both variants are included in delivery.
